## **Product Highlights**

Quick disconnects allow for quickly connecting or disconnecting a terminal. The front end of the terminal has a female-type receptacle which allows the terminal to slide onto and off of a male blade.

Spades have the open tongue end used for rapid insertion on the mounting screw.

The spade is usually used on free standing studs.

Butt Splices allow two stripped wires to be inserted into each end and "butt" in the

center, with the crimp securing both wires together.

## **Features and Benefits**

- Terminals employ the full barrel length that eliminates costly and time consuming location when crimping
- · Finest quality electrolytic copper
- One-piece design, butted seam
- The Spade's open tongue end is for rapid insertion on the mounting screw / stud
- The basic Ring Tongue type is the safest and most reliable because it cannot be disconnected unless the screw is completely removed.
- Block Spades are designed for use in terminal blocks
